

Members of teh Federal Communications Commission:
I respectfully ask you to reject the NAB's attempt to stifle satellite radios programming.

I appreciate the choice that this service gives me in my radio programming, including the traffic & weather reports for my local area. The variety of programming goes way beyond what I am able to receive through the traditioanl means of AM & FM stations in my local area.

Please reject NAB's petition # 04-160 and rather support Satellite radio's ability to provide the broader programming that I am presently enjoying.

Sincerely,

John L. "Les" Foster
Dallas, GA
